

Water Reclamation using GE Innovation

STW Resources Announces Appointment of Chairman and Chief Executive Officer

Houston, TX, USA, February 17, 2009, STW Resources, Inc. is pleased to announce the appointment of Gene Brock to the position of Chief Executive Officer and Chairman of the Board of Directors, where he will take a more active role in defining the future of the Company. Mr. Brock was most recently President of STW, and is responsible for overseeing the Company's day-to-day operations. Before joining the Company, Mr. Brock served as the Vice President for Technology for BJ Chemical Services. Prior to his 14 years with BJ Chemical Services, he began his career at Arco Chemical Company as a manager for Technical Services and Quality, was Vice President for Manufacturing and Technology for Sooner Chemicals and was Manager for Engineering Services for Betz Energy Chemicals. Gene received his MS in Organic and Analytical Chemistry from Kansas University of Pittsburg, where his Master's Thesis was on Organic Pollution of Natural Waters.

Former Chief Executive Officer, Stanley T. Weiner, has chosen to leave the Company to return to his focus on the oil and gas production business. "We appreciate Stan's vision in founding STW Resources, Inc. His dedication has been instrumental to our work in wastewater reclamation", said Mr. Brock.

About STW Resources Inc. STW Resources, Inc. ("STW"), located in Houston, Texas, was created to utilize cost-effective patented technologies to reclaim fresh water from the many contaminated types of waters in our world today. The Company's first project will utilize technology developed by GE Water & Process Technologies to reclaim approximately 70% of the fresh water from otherwise unusable oil and natural gas hydraulic fracture flow-back water and salt water that is produced in conjunction with the production of oil and natural gas. Throughout the U.S., there are several billion gallons of oilfield wastewater being disposed of permanently each year that STW has the capability to recover for reuse or return the environment for human or agricultural uses.
